### DESCRIPTION

- Rosetta acts as a TCP/UDP Server/Client which provides full duplex data transfer between the two RS422 ports and/or 8 parallel GPI/O.
- Configuration settings are changed via a webpage .
- Diagnostics information such as statistics on data bytes and packets being transferred are updated every second on a webpage.
- Stylish Aluminum box
- 85mm x 110mm x 30mm (without detachable mounting ears)
- 12v DC PSU supplied.
